Circle Page Element:

FormattedTextArea Page Element:

*Dynamic*PDF Generator for .NET has a formatted text area page element. This provides rich formatting support for text that appears in the document. You have complete control over 8 paragraph properties: spacing before, spacing after,

FormattedTextArea Overflow Text:

first line indentation, left indentation, right indentation, alignment, allowing orphan lines, and white space preservation; 6 font properties: font face, font size, color, **bold,** *italic and* underline; and 2 line properties: leading, and leading type. Text can also be rotated.

Image Page Element:
Label & PageNumberingLabel Page Elements:

Labels can be rotated
PageNumberingLabels contain page numbering: 1 of 7 pages.

Line Page Element:

Link Page Element:

This is a link to DynamicPDF.com.

Path Page Element:

**Rectangle Page Element:**

TextArea Page Element:

The TextArea page element is great for efficient processign of text that does not require advanced formatting. It offers basic control over leading and paragraph spacing and include text continuation functionality. If all the text does not fit within the

TextArea Overflow Text:

bounds of the TextArea the HasOverflowText method will return a true value. The GetOverflowTextArea method can then be called to create a new TextArea with the remaining text. This functionality makes it simple to span large amounts
Custom Page Element:

Ordered List Page Element:

1. Fruits
    I. Citrus
        i. Lime
        ii. Orange
    II. Non-Citrus
        i. Mango
        ii. Banana

Ordered List Page Element Overflow:

2. Vegetables
    I. Potato
        i. Sweet Potato
    II. Beans
        i. String Bean
        ii. Lima Bean
        iii. Kidney Bean

Unordered List Page Element:

- Fruits
    - Citrus
        - Lime
        - Orange
    - Non-Citrus
        - Mango
        - Banana

Unordered List Page Element Overflow:

- Vegetables
    - Potato
        - Sweet Potato
    - Beans
        - String Bean
        - Lima Bean
        - Kidney Bean

Additional Page Elements:

An **AreaGroup** represents a group of page elements with an area.

A **BackgroundImage** page element is used to add an image to the background of a page.

The **Group** page element is used for grouping page elements together.

The **LayoutGrid** draws a coordinate grid to the page.

A **TransformationGroup** can rotate and scale a group of page elements.
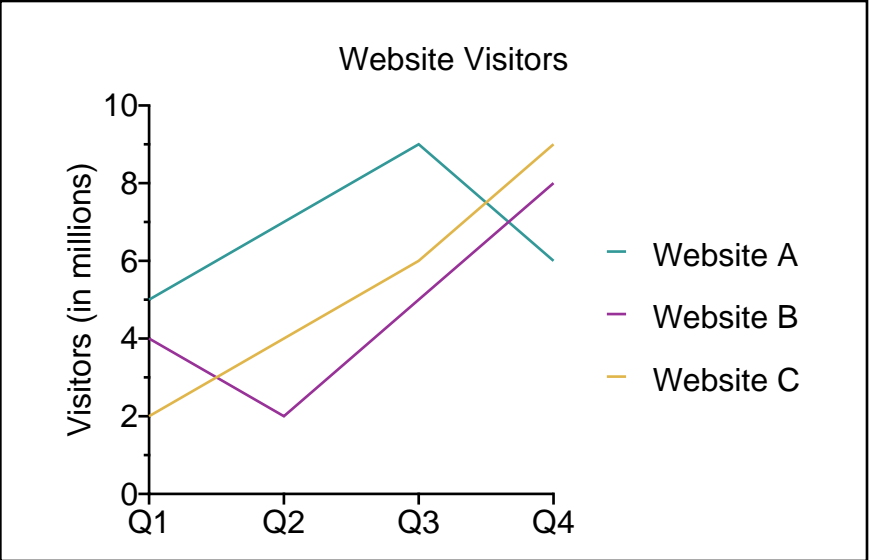

A **TransparencyGroup** can be used to add transparency to page elements.

An **Anchor Group** can have Page Elements within it. It can be anchored to the edge or margins of the page.
